

**Free Reinforcement Kit for  
Evenflo Maestro™ Child Restraint Systems Made Between  
November 24, 2009 and April 9, 2010**

Evenflo Company, Inc. will be offering a free reinforcement kit to owners of certain Evenflo Maestro™ children's car seats manufactured between November 24, 2009 and April 9, 2010. Evenflo has discovered that some of these seats may require a reinforcement plate to upgrade the performance of the seat in certain motor vehicle collisions.

This reinforcement plate is not needed for Maestro™ car seats manufactured after April 9, 2010. The date of manufacture and model number of affected seats is located on a white label on the upper back side of the car seat. Affected car seats are limited to model numbers beginning with "310" that were manufactured between November 24, 2009 and April 9, 2010.

Children who weigh more than 40 pounds may continue to use the Maestro without the internal harness as a belt-positioning booster until the reinforcement plate is installed.

Consumers who own Maestro™ car seats manufactured between November 24, 2009 and April 9, 2010 should register for a free reinforcement kit by calling (800) 233-5921 from 8 AM – 5 PM ET or by visiting [safety.evenflo.com](http://safety.evenflo.com).
