

Safety Recall

Abbott is voluntarily recalling certain

Similac-brand Powder Infant Formulas

due to the remote possibility of the presence of a small common beetle in the product. Affected products include certain Similac powder product lines offered in plastic containers and powder product lines offered in sizes such as 8-ounce, 12.4-ounce and 12.9-ounce cans.

*Products shown here are examples only.

While the formula containing these beetles poses no immediate health risk, there is a possibility of gastrointestinal discomfort if ingested. Questions or concerns about infant health should be referred to a doctor.

Consumers may contact Abbott for a full refund by phone at **1-800-986-8850** or visit www.similac.com/recall.

To be posted through March 23, 2011
