

WINTER SUN SAFETY

Although the temperatures may be cooler, UV rays can still cause serious and permanent damage to your vision, no matter the season.

Snow and ice can reflect up to

80%

of UV radiation

Over

90%

of UV rays can penetrate light cloud coverage

UV radiation intensity increases

16%

for every 1,000 meters you are above sea level

Prolonged exposure to UV radiation can increase your risk for:

- Sunburn of the Eye
- Cataracts
- Eye Cancer
- Macular Degeneration
