†Leading monthly contact lenses: Air Optix Aqua, Biofinity, and Ultra. Superior "overall quality of vision" based upon pre-specified analysis of all patient responses provided on a 5 point scale. Ratings reflect the "Top 2 Box" (T2B) responses ("Excellent"/"Very Good") used in the analysis.

‡Helps protect against transmission of harmful UV radiation to the cornea and into the eye.

^WARNING: UV-absorbing contact lenses are NOT substitutes for protective UV-absorbing eyewear such as UV-absorbing goggles or sunglasses because they do not completely cover the eye and surrounding area. You should continue to use UV-absorbing eyewear as directed. NOTE: Long-term exposure to UV radiation is one of the risk factors associated with cataracts. Exposure is based on a number of factors such as environmental conditions (altitude, geography, cloud cover) and personal factors (extent and nature of outdoor activities). UV-blocking contact lenses help provide protection against harmful UV radiation. However, clinical studies have not been done to demonstrate that wearing UV-blocking contact lenses reduces the risk of developing cataracts or other eye disorders. Consult your eye care practitioner for more information.
